

Scientific Grant Application

The Luca John Foundation is committed to the discovery and advancement of different types of skeletal dysplasia. Only a few types of skeletal dysplasia have had their gene code identified and we are looking specifically to give grants to those research groups that will have that as their focus. We will also look at giving grants to those organizations that will focus on increasing the survival rate, and quality of life of those children afflicted with all types of skeletal dysplasia.

Minimum Requirements:

- Accredited Institution
- Research focuses solely on skeletal dysplasia
- Must provide services free of charge to parents with children who have skeletal dysplasia, both living and deceased

Instructions:

This grant application must be filled out completely leaving no line blank. Any applications received that are not completely filled out will be returned and need to be completed prior to any grant decision being made. Please note that an incomplete application will result in points being deducted from our evaluation procedure, once an updated grant application is re-submitted.

Upon completion please email to grants@lucajohnfoundation.org.

Awarding of Grants:

Grants will be awarded at the beginning of each month. The awarding of grants will be determined by the content of this application, and its completeness. Grants will be given to the organizations that best fit our criteria, and our focus areas. The Luca John Foundation at its sole discretion will give grants out, and completion of this application in no way guarantees any grant will be given.

Determination of Grant value:

Grant value will go hand in hand with the completeness of this application, the additional benefits of the applicant organization, and the quantity requested. While the quantity requested by the applicant organization may not be filled completely by this grant, it will be key in determining the value we place on the grant should we decide to give.
